

Supplemental Table 1. Classification of causes of death according to causes of death categories for the Transplant Registry Unification Management Program (TRUMP)

TRUMP category		Cause of death classification in this study
Rejection/graft failure		-
Infection other than interstitial pneumonia	Bacterial	Infection
	Fungal	Infection
	Viral	Infection
	Protozoal	Infection
	Other	Infection
	Causative microorganism, unknown	Infection
Interstitial pneumonia	Viral, cytomegalovirus	Infection
	Viral, other	Infection
	<i>P. carinii</i>	Infection
	Idiopathic	Respiratory
	Other	Respiratory
Acute respiratory distress syndrome		Respiratory
Acute GVHD		-
Chronic GVHD		Chronic GVHD*
VOD		Liver
Thrombotic microangiopathy		Other
Relapse or progression of underlying disease		Recurrent disease/death after relapse
Secondary malignancy		New malignancy
Bleeding		Other (specific sites were reviewed and reclassified if possible)
External (accidental)		External (accidental)
Organ failure	Liver (VOD section if VOD)	Liver
	Cardiac, cardiomyopathy	Cardiovascular
	Lung	Respiratory
	Central nervous system	Neurological (cerebrovascular causes included)
	Kidney	Kidney-genitourinary
	Other	Other (specific causes were reviewed and reclassified if possible)
Other		Other (specified text data was reviewed and classified as digestive, skin, muscle, pregnancy, suicide, homicide, sudden death, multiorgan failure, other, or unknown)

GVHD = Graft versus Host Disease VOD = venoocclusive disease
